

Noah's Tarp 9, 12, 16-Pitching Instructions

In order to familiarize yourself with your new tent, we recommend you "test pitch" before your first camping trip. For additional information please visit <http://www.kelty.com/c-tents-shelters.aspx>.

Pictured in carry bag

Package Includes: Noah's Tarp, Guy Line, Stakes, Carry Bag.
Poles are NOT included

Noah's Tarp pitched with Kelty Staff Poles (sold separately)

Noah's Tarp with guy cord attached

There are many ways to set up your Noah's Tarp.

Without Poles:

- 1) Find two trees with enough space between them to fit the tarp.
- 2) Spread the tarp on the ground with loops up and the seam pointing towards both trees.
- 3) Use cord to attach the corners to the trees, 6-8 feet off the ground. Tighten cord until center seam is taught.
- 4) Stake out the side corners (with or without guy line) and adjust for desired protection.

With Poles:

- 1) Lay out the tarp over the area you want to cover.
- 2) Set stakes about 6' out to the side of the center tarp seam.
- 3) Attach guy cord from the tarp center seam corners to the stakes.
- 4) Attach guy cord to other side corners and stake.
- 5) Insert pole pins into the grommets at the ends of the center seam of the tarp and stand up poles.
- 6) Tighten guy cords as needed.
